# MY PROMISE and MY GUARANTEE

**PGA Tour Player Brad Faxon said this:  
“Most players I deal with don't have a putting that fits them.”**

We agree!!! It is critical for two very important measurements to be made for the individual golfer, and they are both relational. The patented design of the Ontic/Hot Copper Golf putter guarantees precise fitting for those two critical measurements.

I will say it again, “I care about improving your putting skills to make more putts.”

If you have taken the steps to complete the putting instructional sessions, “The Ritual of Intuitive Putting.” I hope you consider taking the next step! Custom fitting the putter to you is critical for making more putts. If you have not taken the instructional sessions, you can still be custom fitted.

With our multiple patented Ontic/Hot Copper Golf putters, and our proprietary build systems, you will be more consistent, more confident and make more putts, PERIOD! I GUARANTEE IT!

## YOU WILL NEVER HEAR OR GET THIS GUARANTEE FROM ANY OTHER PUTTER MANUFACTURER

I have never been wrong about our fitting process and how it improved putting results. I have hundreds of testimonials. However, if you are not satisfied, there is a 60 day refund policy for the custom fitted putter.
